

Browns Valley Irrigation District

Update 05-15-2009

There is enough water in Collins Lake to leave the irrigation system on FULL TIME at least into September.

This does not mean that you are allowed to waste this precious resource. In order for this to work, we all will need to irrigate wisely. That means that water should not leave your property. If it does, it means that you are over irrigating and wasting water. The water that you do not waste now will allow for the system to be left on longer late in the season.

The Drought is not over

Any changes will be posted on the website and on bulletin boards throughout the district.
