# Collins Lake Usable Water (acre-feet)

\*2015 Irrigation Season was a drought year (most severe in recent years), where the District users took efforts to conserve water. A full season was accomplished. The 2021 projection line simulates the 2021 Irrigation Season with 2015 level savings.

Monday, September 27, Collins Lake level elevation is at 1,110.0 feet, which is 73.0 feet below spill. There are 500 acre-feet (usable) available of a maximum 49,500 acre-feet (usable) at maximum capacity, making the current lake level 1.01% of usable capacity.
